

ADI ABDUL YASIN

FULL STACK DEVELOPER

+62 858-6321-0501 • adi.abdul.ysn@gmail.com • linkedin.com/in/adiabdulysn • github.com/adiabdulysn • Java, Indonesia

Self-taught Full Stack Developer who transitioned from an automotive engineering background into software, now building enterprise systems — from PO booking and fleet management to AI-driven analytics and asset management — for national retail and distribution operations.

PROFESSIONAL EXPERIENCE

PT Harbarindo Baharitama — HO, East Jakarta

APR 2026 – PRESENT

IT Specialist

- Provide helpdesk support for internal staff and systems, and redesigned the corporate company profile website.
- Built AMTS (Asset Management Systems), a full asset-lifecycle platform with role-based access control covering assignments, multi-stage transfers with approval flow, audits, maintenance work orders, and disposal.

PT Matahari Putra Prima Tbk — Warehouse, Bekasi

OCT 2020 – MAR 2026

System Data & Maintenance

- Designed and built 6 enterprise systems from the ground up — PRECISE (PO booking), TMS (fleet operations), ATOREPS (automated reporting), RADAR (real-time AI assistant), SCOPE (pallet management), and eFaktur (tax invoicing).
- Built RADAR, a chatbot-style AI assistant connected to PRECISE, TMS, and WMS databases, delivering real-time insights across stock, shipments, and warehouse operations.
- Automated Batam tax invoice creation (eFaktur) from WMS shipment data, with automatic tax calculation and PPBJ upload.

PT Matahari Putra Prima Tbk — Store, Jakarta & Bogor

JUL 2018 – SEP 2020

EDP (Electronic Data Processing)

- Maintained hardware and network infrastructure, and monitored POS servers and data-entry processing.
- Built RDMS (Report Data Management Systems) for inventory and sales transaction dashboards.

SELECTED PROJECTS

PRECISE — CodeIgniter · Express.js · Vue.js

End-to-end PO booking system covering upload, arrival scheduling, supplier documents, and finance.

RADAR — Node.js · LangChain

AI chatbot connected to PRECISE, TMS, and WMS for real-time operational insight.

TMS — Express.js · Vue.js

Fleet operations platform for shipment requests, load scheduling, and live GPS tracking.

AMTS — Express.js · Next.js

Full asset-lifecycle management with role-based access control and approval flows.
